GREETINGS FOR 1942

As it is impossible for me to write each one of my customers and express my appreciation for the confidence they have placed in me, I am taking this opportunity to thank you all, and wish you a greater degree of success and happiness for each succeeding year. You know I believe a garden to be one of the real requisites to true satisfaction and happiness. It is not just imagination that the vegetables and fruits you are able to bring from your own garden are a little sweeter and a little better than those that you usually buy. The flowers you have actually planted and tended yourself will brighten the home a little more and bring greater joy to you and your friends.

*"Say it with flowers" is a florists' slogan,
Flowers, of course, are friendship's token,
But what does it really mean to you?
Though the giver spends, and lavish, too,
If he knows not what the toil has been
Or never has climbed from an Alpine glen,
To the mountains high through the mists and snow
To gather the edelweiss where they grow.
Ah—such are the flowers we all do crave,
More for the present than for our grave,
And we see their beauty more and more
For the giver's hands so scarred and sore.*

INTRODUCTION FOR 1942

BOSTONIAN (*Cham.*)

Parentage—(Wurtembergia x Salbach Orchid x J. S. Bach.) This is the seedling S-35/16+7A that won the special seedling award and vote of commendation at the N. E. G. S. Boston 1941. We also hold a certificate of commendation won at the N. E. G. S. 1939. Also won award of honorable mention this year at the Empire State Seeding Show. Decorative red with 12 to 16 four-inch florets open on 20 to 23 bud spike. Blooms have about perfect placement and the extra tall spikes never crook.

We did not intend to introduce it this year as stock is still very limited, but have concluded to share this glad with a few of the fans. L., M. and Jumbo bulbs, \$5.00 each. No Blts. or Small bulbs this year. No discounts.

FORMER INTRODUCTIONS

ROSY CHEER (*Cham.*)—Rose red with splashes of white or cream in the petals. It is very different from anything on the market and makes a wonderful spike of large flowers with 8 to 9 out. Twenty buds and blooms not uncommon. Flowers are always well placed and stem never crooks. For substance of flower and vigor of plant, few can surpass it. Fine propagator. L. or M. 50c each; S. 3—50c; Blts. 10—50c.

HEAVENLY DAYS (*Cham.*)—This is a superb pink. Pronounced by Lins Trial Gardens as "heavenly color pink." Large flowers with tall spike. Try this one at our risk. Money refunded if you return your stock after blooming it. L. and M. size 50c each; S. 3—50s; Blts. 10—50c.

MARY MARKOWITZ (90 to 98 days)—This is a deep orange with deep red blotch that we believe is sure of a great future as a commercial and show flower—seven to ten 5-inch flowers open on a perfect spike of 20 buds. (\$2.00 each for L. or M. bulbs; \$1.00 for S.; bulblets, 5 for \$1.00.)

DR. KEMPTON (80 to 90 days)—Has won award of merit in 1939 and award of commendation in 1940 from the E. S. G. S. We had 20 bud spikes with as many as 10 out this year under ordinary field culture. A brilliant glistening red, flowers 5 inches and over. This is a great bulblet producer. Every spike is good. L. 50c each; M. 30c; S. 15c; Blts. 15—50c; 6 L., 6 M., 6 S. and 200 bulblets for \$5.00.

CAROLINE WERNER GANNETT—I am sure that anyone who has seen this glad will deem it to be worthy to be head of the giant class. It having won its final award in the seedling class of the E. S. G. S. (Award of Merit) in 1940. It has started on its career as a winner, having now won first and second prize in the class for the newer introductions at the E. S. G. S. show at Syracuse last fall. If you saw them you know for a certainty that I have not exaggerated in my various claims for this glad. Color—medium rose, with large cherry-red blotch, outer petals flaked lavender. Its round flowers are from 7 to 8 inches in diameter and from 9 to 11 out on a spike, strong enough to stand erect under its immense load. Placement and substance are of the best. We have shipped spikes tight in bud for long distances and they have bloomed out in perfect condition. Produces a good fair quantity of bulblets that grow about 100 per cent. Holloway Dream Gardens of Nebraska report that 25 Caroline W. Gannett out of 26 bulblets gave satisfactory growth. We include directions for growing these bulblets to large and medium size bulbs in one season. We have had a large percentage of them bloom from bulblets when grown according to these directions, and you wouldn't believe that they were grown from bulblets either.

Stock is now sufficient so we can quote at the following prices: L. and M. bulbs \$5.00 each; Blts. 50c each; \$5.00 for 12.

PLEASE READ BEFORE ORDERING

Orders for Less Than \$1.00 Must Be Accompanied by Sufficient Postage

The different sizes will be designated as follows: L. for large, M. for medium, S. for small, and Blts. for bulblets. Large and medium bulbs are always of blooming sizes and many of the small ones will bloom and will make the best of bulbs for the next season.

I would mention that there are a few varieties that do not make very large bulbs. M. size, in other words, would be a good size for a few of these varieties.

That does not mean that these varieties may not be very choice. I happen to know that the sweepstake spike at the State Show at Rochester in 1937 was produced from a bulb of but little more than 1 inch in diameter.

To avoid disappointment you should get your order in reasonably early, especially if you are going to order some of the newer varieties, as many of these are limited in quantity. *We will accept your C. O. D. order for future delivery.* We do not substitute unless we give better value.

All orders of \$1.00 or over will be prepaid anywhere in U. S. A. I am giving no discounts on these prices but I do try to give all customers a pleasant surprise. Of course, we can give wholesale quotations on large lots. Please send list of just what you want for estimates. The larger your order, the more extras you will receive.

Quotations are usually made three at the dozen rate, as we cannot afford to put up single items for less than 10c. So you get the benefit of the dozen rate whether you order three, six, nine, or twelve. Where priced singly, multiply by 10 for dozen rate.

Our prices are as low as consistent, quality considered. There is just as much difference in glad bulbs as anything else in the line of seeds you may buy. This does not mean that you must pay exorbitant prices for good bulbs. Our bulbs are as good as you can buy at any price. One of the greatest mistakes the average buyer is liable to make is to purchase bulbs that have been forced to the limit in order to make a grand display. Such bulbs seldom repeat. I have a great many customers tell me that their flowers were better than mine. I figure that it is a better recommendation than to have them say that they could not get as good flowers as I showed them. Of course, you may grow a poor crop from good seed, but you cannot produce a good crop from poor seed.

OUR GUARANTEE

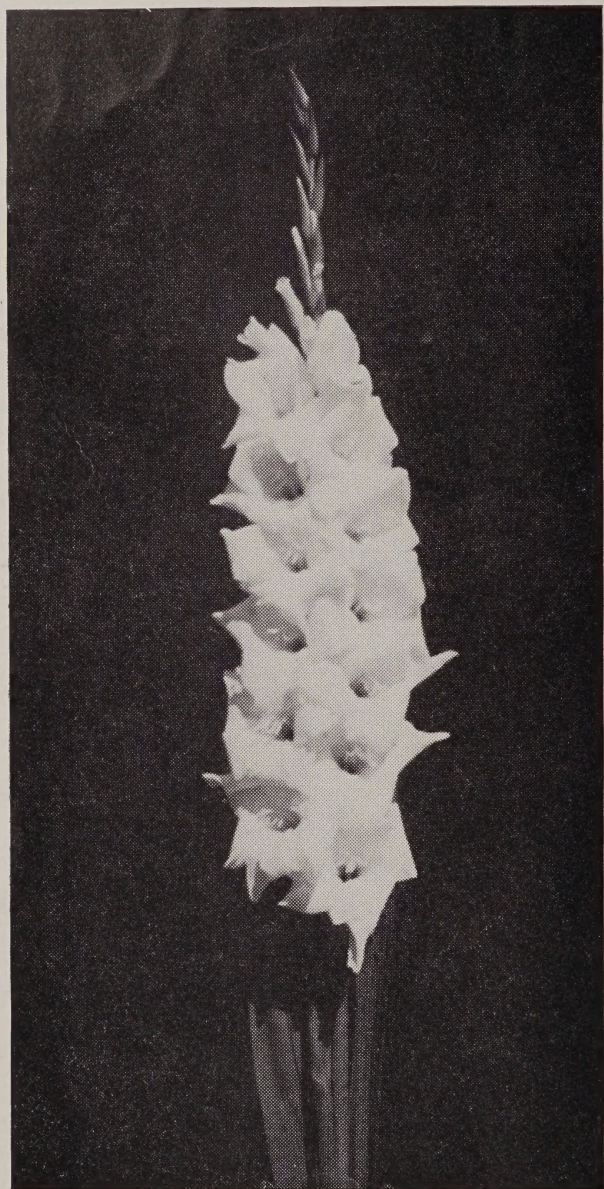

If, upon examination, bulbs are not satisfactory, return them and your money will be refunded. Our guarantee does not mean that we are in any way responsible for any failure due to weather conditions or insects. However, if you have any complaint at blooming time just send it along to us and we will try and do our part.
